PROFESSIONAL SUMMARY

Full-stack developer with a Computer Engineering background, experienced in React.js, Next.js, Node.js, and Spring Boot. Builds scalable, microservices-based applications with secure authentication and event-driven architecture, deployed via Docker and AWS with automated CI/CD. Agile team collaborator focused on clean, production-ready code.

EDUCATION

BSc.Eng (Honours) in Computer Engineering Mar 2022 – Present
Faculty of Engineering, University of Ruhuna, Galle, Sri Lanka

GCE Advanced Level Aug 2019
KM/KM/ Carmel Fatima college National School

PROFESSIONAL EXPERIENCE

Software Engineer Nov 2025 – May 2026
Faite (PVT) Ltd, Jaffna [↗](#)

Software Engineer - Intern May 2025 – Nov 2025
Faite (PVT) Ltd, Jaffna [↗](#)

TECHNICAL SKILLS

Programming: Java, JavaScript (ES6+), TypeScript, C++, Python
Frontend: React.js, Next.js, Flutter, Tailwind CSS, Material UI
Backend: Spring Boot, Node.js, REST APIs, Microservices, JWT Authentication
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Render, Vercel
AI / ML: RAG, LLM APIs (Groq, OpenAI), Prompt Engineering
Tools and Technologies: VS Code, IntelliJ IDEA, Jira, WebStorm

NON-TECH ABILITIES

Project Management: Effective Time Management, Goal-Oriented, Adaptability
Leadership: Collaborative Teamwork, Conflict Resolution, Strong Communicator
Creative: Innovative Problem Solving, Presentation and Moderation Skills
Languages: English (Fluent), Tamil (Native), Sinhala (Intermediate)

PROJECTS

Event-Driven Order Processing System [↗](#) Sep 2026
Node.js, Apache Kafka, Avro, MongoDB, Docker, KafkaJS

- Built an event-driven order processing system using **Apache Kafka** and **Avro** for schema-based order messaging, with Node.js producers and consumers.
- Implemented message retry handling and **Dead Letter Queue (DLQ)** processing for temporary and permanent failures.
- Containerized the **Kafka** infrastructure with **Docker**.

Library Management System - Full DevOps Lifecycle [↗](#) May 2026 – Present
MERN, Docker, Jenkins, AWS, Terraform, Ansible, GitHub Actions, Kubernetes

- Containerized MERN stack with **Docker Compose**, built Jenkins CI/CD with GitHub webhooks, and provisioned AWS EC2 via Terraform and Ansible
- Orchestrated frontend, backend, and MongoDB services with **Docker Compose** and **Kubernetes**, including persistent storage, container networking, and environment-based configuration.

Digital Asset Approval Workflow System

June 2026 – July 2026

Spring Boot, Spring Security, React.js, MySQL

- Built a secure full-stack document management system with **Spring Boot**, **Spring Security**, and **React.js**, backed by SQL.
- Implemented **JWT-based authentication** and role-based access control across three permission tiers (Employee, Manager, Admin).

Financial Document Q&A System (RAG)

Jun 2026

Python, Streamlit, Sentence-Transformers, Groq / OpenAI API, TF-IDF, Word2Vec

- Combined NLP + semantic search + **LLM** generation (Groq, OpenAI) to retrieve and answer accurately from large documents.
- Applied prompt engineering and validated accuracy on real SEC filing Q&A data.

Ticket Booking & Tracking System

May 2026

React.js, Node.js, Express.js, MongoDB, Vercel.app, Framer Motion

- Developed a full-stack ticket booking system using the **MERN stack** with RESTful APIs.
- Implemented **JWT authentication** and **role-based access control** for Admin, Agent, and User roles.
- Built ticket creation, assignment, tracking, and management modules with role-specific functionality.

Sleep Tracker

Jan 2026

Next.js, TypeScript, Clerk, PostgreSQL, Prisma ORM

- Built a personal sleep journal app with **Next.js**, using **Clerk** for authentication (OAuth, GitHub Auth) and **PostgreSQL** via **Prisma ORM** for persistence.
- Implemented date-based sleep records with duration tracking (0–12 hours in 0.5-hour increments) and qualitative mood tagging (Refreshed, Tired, Neutral, Exhausted, Energetic)

Matrimony System

May 2025 – June 2025

React.js, TypeScript, Redux, Node.js, MongoDB, Tailwind CSS, Material UI

- Developed a responsive and customer-friendly frontend and backend for matrimony web application.
- Integrated redux state management and Stripe payment services.

VOLUNTEER EXPERIENCE

Demonstrator – ReXtro 2025 Silver Jubilee Engineering Exhibition

Dec 2025

Embedded Engineering Zone, Faculty of Engineering, University of Ruhuna

Member

Apr 2024 – Apr 2025

IESL, Galle

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – Coursera
- HackerRank Certification – Coding & SQL Proficiency
- Career Essentials in Software Development – Microsoft and LinkedIn
